

Subject ID	Gender	Age	Exam Date
MEM25936A14C5E8	Female	58	2024-06-18

System/Organ	Bio Age	Age Gap
Overall	59.6 yrs	+1.6 yrs
Cardiovascular	46.8 yrs	-11.2 yrs
Nutrition	61.0 yrs	+3.0 yrs
Digestive	55.6 yrs	-2.4 yrs
Respiratory	57.0 yrs	-1.0 yrs
Blood	NA	NA
Immune	NA	NA
Kidney	46.2 yrs	-11.8 yrs
Endocrine	63.5 yrs	+5.5 yrs
Bone	NA	NA

Overall Aging Drivers

Clinical Indicator	Current Value	Reference Range	Age Deviation (yrs)
Forced Expiratory Volume in 1 Second	2.52 L	0.70-5.15 L	-0.8 yrs
Right brachial-ankle pulse wave velocity	1753 cm/s	795.00-2292.00 cm/s	+0.9 yrs
Left brachial-ankle pulse wave velocity	1858 cm/s	925.00-2329.00 cm/s	+1.0 yrs
Left and Right Sides Ward's Triangle Z-Score	0.6	-2.70-3.70	+1.2 yrs
Follicle-stimulating hormone	84.72 IU/L	0.30-20.55 IU/L	+1.4 yrs
Intracellular water / Extracellular water	1.47		+1.4 yrs
Beta-human chorionic gonadotropin	0.68 U/L		+2.2 yrs

10-Year Disease Risk Prediction

Disease/Event	10-Year Risk
Aortic Atherosclerosis	86.0%
Diabetes	63.0%
Emphysema	54.0%
Stroke	53.0%
Hypertension	44.0%
Cardiac Insufficiency	25.0%
Coronary Heart Disease	24.0%

Conclusions

- Your overall biological age (59.6) is older than actual age (58) by 1.6 years.
- Aging accelerated systems: Nutrition, Endocrine
- Aging decelerated systems: Cardiovascular, Respiratory, Digestive, Kidney
- Factors that significantly contribute to your accelerated aging include: Beta-human chorionic gonadotropin, Intracellular water/Extracellular water, Follicle-stimulating hormone, Left and Right Sides Ward's Triangle Z-Score Mean Value, Left brachial-ankle pulse wave velocity (left baPWV), Right brachial-ankle pulse wave velocity (right baPWV), Forced Expiratory Volume in 1 Second (FEV1)

The disease risk results in this report are based on population statistical analysis and only indicate potential health concerns that may require further attention. Higher risk does not represent actual disease probability. It is recommended to consult relevant specialists for further evaluation.
